# Data Structures & Algorithms In 21 Days Master DSA, Unlock Opportunities

Get ready for a power-packed 21-day live masterclass designed to sharpen your coding skills andhelp you ace tough tech interviews.

| Date of Master Class | Time for Master Class | Duration |
| --- | --- | --- |
| **May 04 - 2026** | **8:30 pm – 9:30 pm** | **1 Hour/Day** |

Section 1 (Days 1-3)

# DSA Fundamentals & Arrays

Grasp core DSA concepts, time complexity, and master array problems. Perfect your problem-solving skills with essential array techniques for technical interviews.

8 lessons

01 Introduction to DSA & Time Complexity

02 Space Complexity Analysis

03 Arrays 101: Understanding the Basics

04 Kadane's Algorithm: Maximum Subarray

05 Array Rotation Techniques

06 Two Sum Problem & Variations

07 Dutch National Flag Algorithm

08 Finding Equilibrium Index

Section 2 (Days 4-7)

# Strings & Hash Maps

Master key string manipulation techniques and leverage hashmaps for efficient problem-solving. Learn to tackle common string problems and optimize solutions with hash-based data structures.

8 lessons

01 String Fundamentals & Operations

02 Palindrome Detection Algorithms

03 String Reversal & Frequency Counting

04 Grouping Anagrams Efficiently

05 Finding Longest Common Prefix

06 HashMap & Set Fundamentals

07 Two Sum with HashMaps

08 Longest Consecutive Sequence

Section 3 (Days 8-13)

# Recursion & Binary Search

Master recursive problem-solving and binary search techniques. Learn to tackle complex problems using recursion and apply efficient searching algorithms for optimized solutions.

8 lessons

01 Understanding Recursive Thinking

02 Implementing Fibonacci & Factorial

03 Working with Recursion Trees

04 Generating Subsets & Permutations

05 Binary Search Implementation

06 Lower & Upper Bound Techniques

07 Searching in Rotated Sorted Array

08 2D Matrix Search & Peak Element

Section 4 (Days 14-15)

# Sorting & Dynamic Programming

Master sorting algorithms and dynamic programming techniques. Learn key sorting methods and solve complex DP problems like Knapsack, LIS, and Coin Change for technical interviews.

8 lessons

01 Merge Sort: Implementation & Analysis

02 Quick Sort: Partitioning Strategy

03 Sorting Applications: Sort Colors

04 Merging Intervals & Kth Largest

05 Dynamic Programming Foundations

06 Memoization vs Tabulation

07 0/1 Knapsack Problem

08 Longest Increasing Subsequence

Section 5 (Days 16-21)

# Data Structures Mastery

Master essential data structures like Linked Lists, Stacks, Queues, Trees, and Graphs. Learn to implement and solve popular interview problems using these powerful data structures.

8 lessons

01 Linked List Operations & Reversal

02 Stack Implementation & Applications

03 Queue Operations & Sliding Window

04 Tree Traversals & Properties

05 Lowest Common Ancestor

06 Graph Representation & DFS

07 BFS & Connected Components

08 Cycle Detection in Graphs

# Full Access Plan

~~₹9999~~

**₹5999/-**

Offer Price

- ✔ One Time Payment
- ✔ Lifetime Access
- ✔ Live Class + Recordings

**Buy Now - ₹5999**

Are already Enrolled for this weeks
